ABOUT ME

I'm very young geek and passionate developer for web. I use awesome toolbox for my work — MacBook with TextMate for coding, git for source control, Rails and some gems for development. I love new technologies and can learn anything fast.

EDUCATION

Still getting education at school (I'll finish it at 2014), but I believe education means nothing now. The only thing that matters is the skills.

EMPLOYMENT

I have never been employed because almost nobody wanna hire school student.

LANGUAGES SPOKEN

- + Russian, native
- + English, upper-intermediate
